**Digital Business
Solutions**

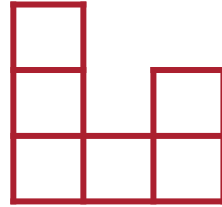

FGC delivers end-to-end project solutions through a uniquely integrated model that combines expertise across its divisions. Each division is fully aligned to operate as one cohesive engine, ensuring that infrastructure, technology, operations, and digital platforms are seamlessly connected from concept to completion.

This synergy enables us to manage all aspects of a project under one roof, reducing complexity, accelerating timelines, and ensuring consistent quality at every phase.

At FGC, clients gain a single, accountable partner capable of delivering comprehensive, future-ready solutions tailored to the most demanding environments.

The background is a solid dark red color. It features abstract, wavy, light red lines that flow across the top and bottom of the frame. On the right side, there is a stylized, light red silhouette of a house with a gabled roof and a chimney.

Construction, Mechanical, Electrical and Plumbing (CMEP)

Construction & MEP

FGC's CMEP Unit specializes in delivering complex, high-quality construction projects with a strong focus on design, architecture, and execution. We manage the full project lifecycle; from IFC and shop drawings to architectural, structural, civil, and acoustic works, ensuring precision, compliance, and efficiency. Our integrated approach covers construction management, material handling, furniture installation, and full MEP solutions, including HVAC, fire protection, power distribution, safety and security systems, and building management. All systems are seamlessly integrated with BIM (Building Information Modelling) and Revit modeling, and supported through documentation, training, and maintenance, making CMEP a reliable partner for turnkey solutions across diverse sectors.

Targeted Sectors:

- ❖ Tower Buildings
- ❖ Corporate Offices
- ❖ Malls
- ❖ Hospitals and Clinics
- ❖ Theatres
- ❖ Hotels
- ❖ Government Facilities
- ❖ Schools
- ❖ Factories
- ❖ Warehouses
- ❖ Restaurants

Our Partners

| Systems Integration

Systems Integration

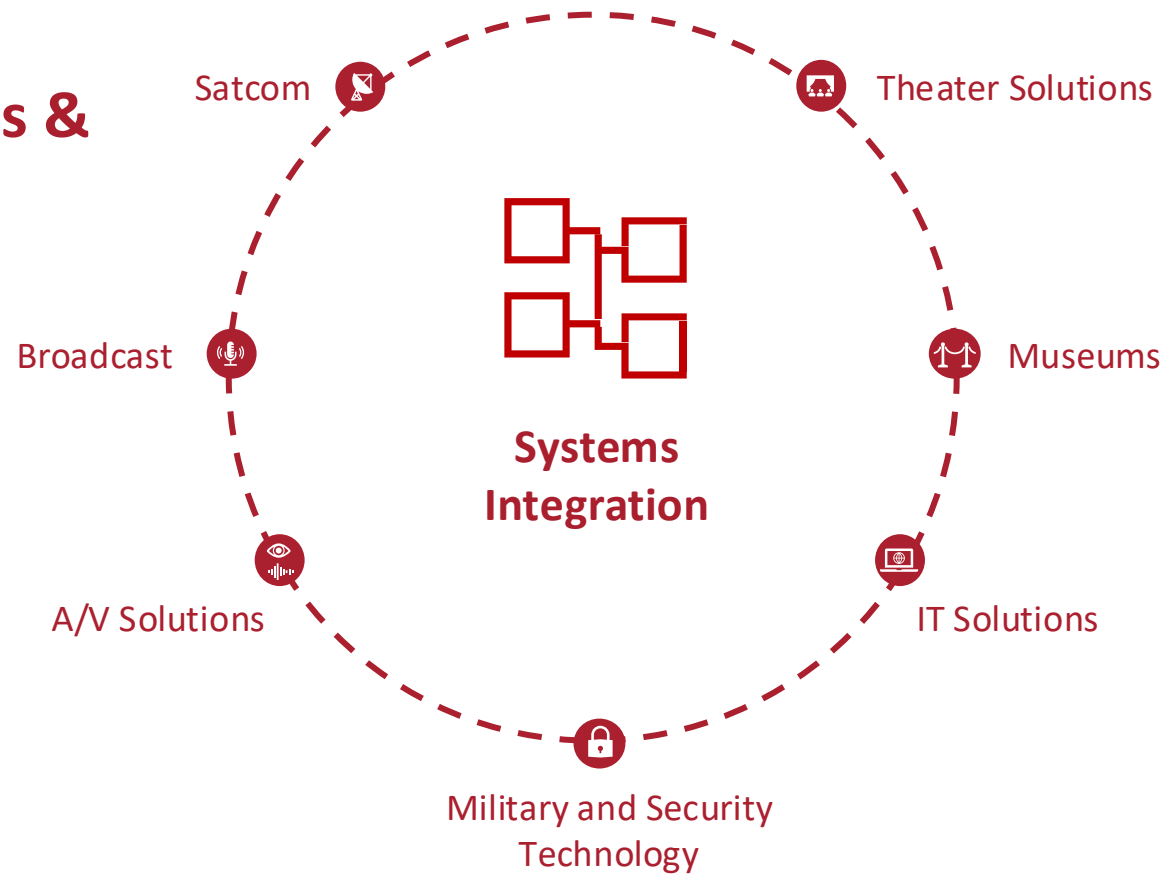

The Systems Division is the foundation upon which First Gulf Company (FGC) was built. Established in 2001, it was the first business unit formed within the company and the primary sector through which FGC began its operations. Over the years, it became widely recognized as the company's flagship, earning FGC a strong reputation for technical excellence, innovation, and dependable project execution.

With more than two decades of experience, Systems has played a pivotal role in positioning FGC as a trusted leader in delivering end-to-end technology solutions across the region.

FGC is proud to be the first and only Saudi company to offer the full spectrum of system integration services; including broadcast, audiovisual, SATCOM, theater, and immersive technologies, under one roof.

Today, FGC stands as a regional leader in the broadcasting field, known for its deep expertise, future-ready solutions, and proven track record across government, media, and commercial sectors.

| Other Solutions

Digital Business Solutions

❖ Centralized Notification Center (CNC):

A unified platform offering **SMS, WhatsApp for Business, and mobile push notifications** to streamline enterprise communication. Designed to support alerts, transactions, and AI-driven customer engagement across multiple channels.

❖ eShopsHub:

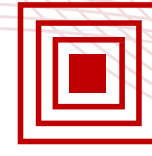

A white-labeled mobile solution tailored for the hospitality and retail sectors. Enhances guest and customer experiences, drives revenue, and optimizes operations through custom hotel apps and centralized mall shopping platforms.

Big Data Solutions

By addressing key challenges, such as data silos, scalability, compliance, and sounder forecasting, we tailor **bespoke solutions** that enhance decision-making capabilities and improve operational efficiency.

Our comprehensive expertise in areas like **data governance, advanced analytics, and enterprise data warehousing** enable us to deliver solutions that unlock the full potential of data for our clients.

Telecom

We provide **end-to-end network infrastructure solutions** that drive digital transformation across Saudi Arabia.

Our services encompass **fiber optics, wireless communication, OSP works, and turnkey systems** for smart cities, airports, seaports, and industrial facilities. With expertise in civil, electrical, and security systems, we deliver scalable, future-ready solutions tailored to national growth and regulatory standards, ensuring safety, efficiency, and operational excellence in every project.

| Our Projects

Tunnel Ventilation System Riyadh Metro

Overview:

Develop execution of Engineering, shop drawing, supply, install, test, and commission a SIL2 TVS to manage smoke heat generated from train/tunnel fires and cool down the temperature in the tunnel for Line 1 (Olaya St) and Line 2 (King Abdullah Road):

- 17 Deep Underground Stations (Line 1)
- 6 Shallow Stations (Line 2)
- 2 Ventilation Shafts (Line 1)

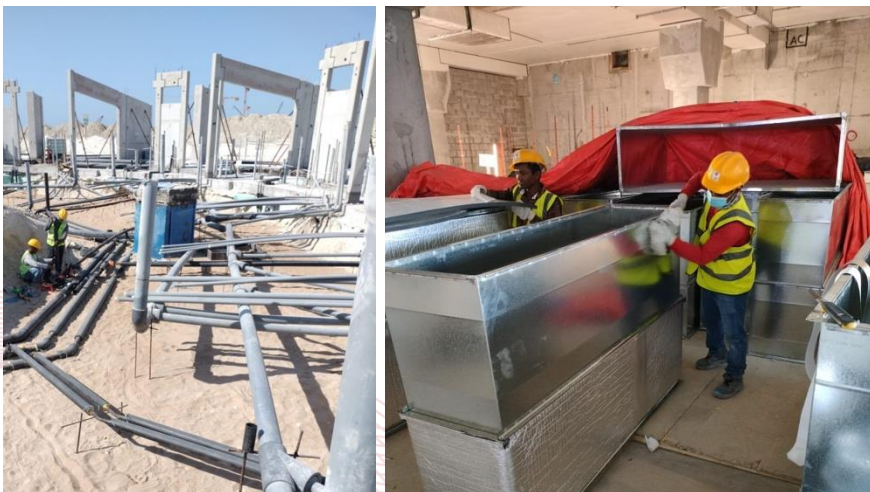

Construction & MEP

Construction, Infrastructure & Systems Development - Shura East Hotel

Overview:

HE1 Hotel is referred to as “The Coves” by Faena. Hotel HE1 is a LEED Platinum sustainable Hotel resorts located in the east/south side of Shura Island. The hotels overlooks the golf course and has an open view to the Red sea. It consists of 150 Keys 7 Star quality, FOH, utilities, BOH, Reception, Restaurants, and amenities. FGC is the main contractor on this landmark project, responsible for the construction, infrastructure, and systems that will bring the development to life.

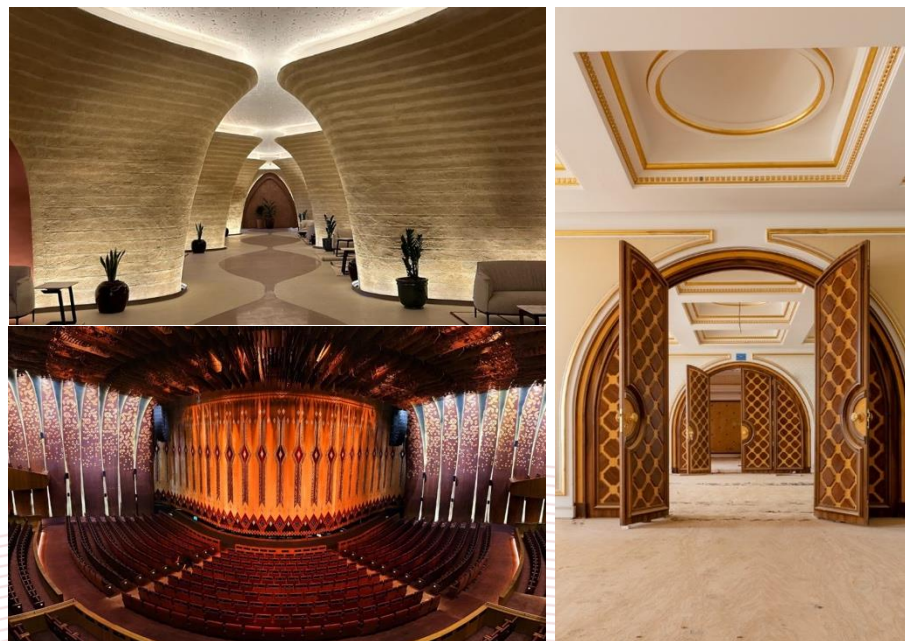

Fit-Out, Finishing, and MEP Renovation - KFCC

Overview:

King Fahad Cultural Center, a multifaceted building in Riyadh, is undergoing a comprehensive refurbishment. The project focuses on revamping various interior spaces and certain external facades to modernize and enhance the facility.

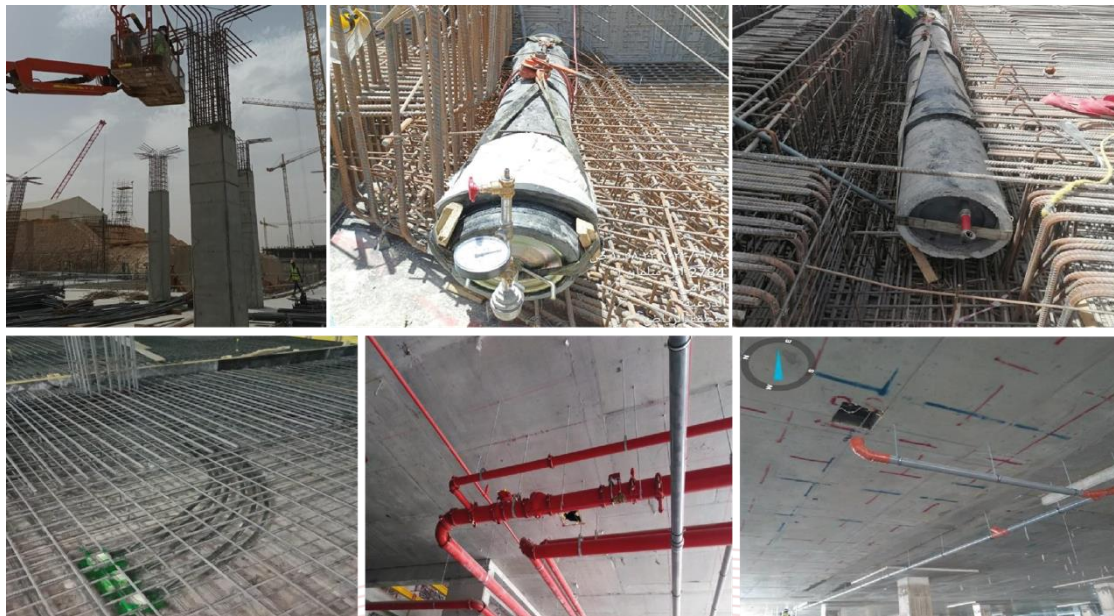

DSQ Diriyah Square Package 2 Super Basement and Tunnels

Overview:

The state-of-the-art three-level underground car park supports the commercial heart of the culture and heritage giga project's exciting Diriyah Square. The mixed-use district will offer a combination of leisure and entertainment, ultra-luxurious hotels, retail, grade A offices, the King Salman Grand Mosque, and residential units designed in the traditional Najdi architectural style, set for completion in 2024.

Approaching 1 million square meters in floor area, the car park hosts an intricate network of underground roads and tunnels below Diriyah Square with multiple access points, accommodating 10,500 cars.

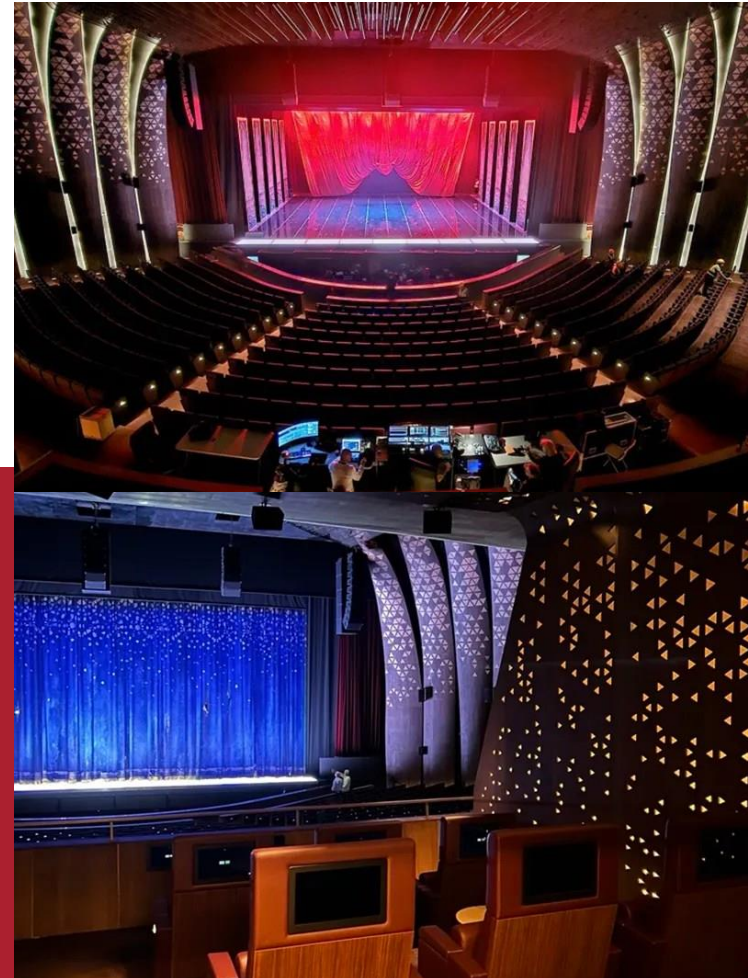

Theater Renovation & AV System Upgrade - KFCC

Overview:

The project entails the comprehensive renovation of the KFCC structure, encompassing civil work, upgrades to the theater system, AV enhancements, production lighting, and stage engineering advancements.

Theater Solutions

Systems Integration

Broadcast

Studio A XR Transformation

Overview:

This project encapsulates a comprehensive redesign and upgrade of the main news and talk-show studio the Saudi One channel. In order to achieve this, we restructured the studio into a world class facility, leveraging the most recent technical systems, innovative designs, and the latest augmented and virtual reality systems in the market. This studio was designed for flexibility and adaptability, and utilized advanced materials such as high-performance LED screens, cutting-edge lighting systems, and state-of-the-art equipment.

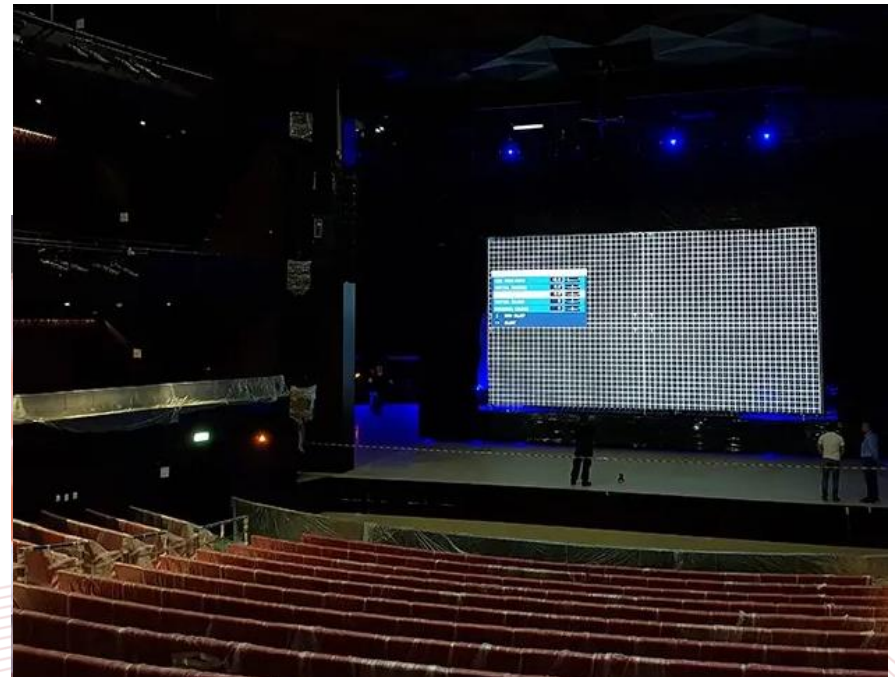

AV Solutions

ITHRA AV Systems Integration

Overview:

The project offers tailored theater and cinema solutions for the King Abdulaziz Center for World Culture (Ithra) while ensuring flexibility for exhibits and diverse requirements in the Great Hall.

Facility Management

Operational Maintenance
